

# Women's Oppression: working class solutions

**SPEAKER:** Lynda Little  
(Central Committee member of the Revolutionary Workers League and long-time activist in the women's liberation movement.)

With the deepening of the economic crisis, attacks on women's rights have escalated. From soft-core T.V. porn to legislated restraints that widen the wage gap between men and women. From anti-woman abortion laws to dwindling numbers of daycare spaces. These are all manifestations of an overall attack on working people that has singled out women as its first victims.

How should we fight back? Lynda Little will talk about working class solutions to these problems.
